EXPERIENCE

Student Researcher | University of Maryland — MAR 2022 - PRESENT

Contributed to a usability study of a mobile app that helps stroke survivors in their rehabilitation process. Conducted testing of the mobile app and designing the study protocol. Designed interfaces for parts of the app screens.

Global IT Intern | Colgate Palmolive (CP) India Ltd. — JAN - JULY 2021

Spearheaded two automation projects, decreased human intervention & accelerated the processing time by 5x. Experimented & succeeded at integrating Python with SAP to update key data as well as develop a functional website using Django

SELECTED PROJECTS

InTune | Voice Notes App — FEB - MAY 2022

Designed a mobile app that lets users stay in touch with their loved ones using just voice notes. Created an experience where people's voices are captured & cherished, leveraging color-driven storytelling and voice-based querying.

Personal Emotions Tracker (PET) | Mood Tracker App — OCT - DEC 2021

Designed a mobile mental health tracking app that offers a conversational interaction mode to infer user's mental states. Leveraged interactions with an animal avatar, that acts as a visible externalization of the user's mental health.

iSchool Identity | Research for UMD iSchool — OCT - DEC 2021

Conducted contextual interviews to develop affinity diagrams and experience models to discover and represent aspects of InfoSci students' identity. Provided targeted solutions to better market and portray the program within the UMD ecosystem.
